### Why It Works:

- Influencer content = built-in credibility
- Often outperforms paid ads
- In 2025, short-form content drives most buying decisions

# CHAPTER 2

## Finding & Contacting Influencers

### Who to Choose:

- Micro-influencers (5K–50K followers)
- Better conversion, lower cost
- Match niche + audience to your product
- Check 'TOP Content Creator Engagement List'

### Check:

- Engagement rate
- Comment quality
- Content type (Reels, Reviews, Trends)

### Avoid:

Fake engagement (high views, no real comments)

### Weekly Content Plan:

- 2 educational posts ("How to use this")
- 2 entertaining (trends, memes)
- 2 testimonials (UGC)
- 1 giveaway or CTA reel

### What is UGC (User-Generated Content)?

- Real users. Real reactions.
- No studio, no filters = More trust

### Top-performing UGC types:

- "Unboxing" videos
- "I tried this so you don't have to"
- Problem → Solution → Smile

Record with phone, daylight, casual vibes

# CHAPTER 4

## Content System That Doesn't Burn You Out

### Viral Content Formula:

Almost every viral TikTok/Insta Reel follows this formula:

1. Hook (within 1–3 seconds)
2. Problem or relatable moment
3. Transformation or result
4. CTA (comment, click link, DM)

Use Hook Library in your tools section Edit with CapCut or ask the editor from the program Chapter 5 Influencer Programs & Affiliate

# CHAPTER 5

## Influencer Programs & Affiliates

### Turn Influencers into Ambassadors

Instead of just 1 video, give them reason to keep promoting:

- Offer affiliate code (10–20%)
- Use Shopify plugin (ex: UpPromote, GoAffPro)
- Or track manually via custom codes
- Add QR code to your thank-you card in packaging

# CHAPTER 6

## Weekly Checklist

### Checklist:

- Contact 5–10 influencers
- Send 3+ product packages
- Launch a giveaway
- Start your weekly content system
- Test affiliate code strategy

### Final Takeaways:

1. People trust people, not perfect brands
2. UGC = high-performing, low-cost content
3. Influencers help you scale visibility & credibility
4. Giveaways + affiliate systems = organic snowball effect
